1351-1401 CELLULOSIC THINNER

Fields Of Use

Cellulosic Thinner is used for thinning of all cellulosic based primer and top coats; and their adaptation of the application viscosity. After the application, it can also be used in cleaning of all the related special products and all the coating materials used for application.

Application

Cellulosic Thinner should be used at the rates, which shall regulate the application viscosity specified in technical properties of the cellulosic materials with which it shall be used. And besides these rates, it should not be added to the product either deficiently or excessively so that the performance expected from the system can be provided.

Notes

While Application:

The required ventilation should certainly be ensured in the applications made in the covered spaces for not causing any health problem or fire hazard. It should be kept away welding sparks, heat sources and bare flames during application.

Smoking is **certainly** prohibited during application.

Teknik Bilgi

Cellulosic Thinner

Product Code

1251-1401

Color

Colorless

Density

0,80 ± 0,02 g / ml

Package Life

Minimum 6 months for the unopened package.(at room temperature)

Flash Point

< **15 °C**

Health and Security Principles

If Cellulosic Thinner is used inconveniently, it may be harmful to the health and may cause fire risk. Therefore, necessary precautions should be taken during storing, carriage and use.

General Warnings

Use with mask only in the well-ventilated areas and do not inhale.

The aforementioned product properties have been arranged according to the cutting-edge technology results and laboratory test results and they are based on recommendation. The described conditions and dominant local status and other materials to be used should certainly be taken into consideration during use of the product.

For achieving the best results, the convenient devices and application properties should be taken into account.
